Examiner Note: You must sign this form unless it is an Attachment to a signed Office action.

  
 Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Claims 1 and 8: The amended claims seems to overcome the prior rejection. The prior art needs to be investigated by redefining the variables if it were to read the amended claims. In addition, further search is required.

Regarding claims 2,9: the amended claims is further clarified if the claim language addressing the engine speed is described by: "a change of current engine speed evaluated as a difference between engine speed at the time of opening the intake valve and engine speed at the time of closing the intake valve". Such a change seems to overcome the prior art speed variation. Further search is required.
